

Building Inspections

Roof Photo Guidelines

When providing photos in lieu of an In-Progress inspection please use the following guidance to ensure that there are no issues:

Photo of home from street

Photo of Permit

Roof sheathing nailing showing minimum 8d ring shank nails at 6" on center (Show all angles of roof with a few close ups)

Roof Underlayment and fasteners per handout (Show all angles of roof with a few close ups)

Photos of all flashings including eave metal with 12" nail spacing.

Photos of 4" tar strip at roof edge.

Photos of shingles as they are being installed showing 6 nails per shingle.

Photos can be uploaded into the system or printed onsite at the final inspection for the inspector to look at.
